Date: November 22, 2010

We wish to send two officers to a Smith and Wesson Armorer Training, one day school located in Ohio. This is the closest training location we can find. We need them trained in the Smith and Wesson handguns that were purchased last year. They previously had been to Glock Armorer training but now we use the Smith and Wesson handgun also. Cost is \$175.00 per student plus two nights in a hotel. The class date is February 24<sup>th</sup> 2010.

Respectfully Submitted

Ref: Updating hardware/software for Accident Reconstruction

Date: 12/8/2010

Our department is currently the only Law Enforcement Agency in the County with the equipment and capability to do a full accident reconstruction. Two of our officers have expert witness status in court and we have another officer in the training process to become an accident reconstructionist. Our department is the only one with the device called the Total Station which can measure a accident scene using laser technology. We also have the equipment to plug a computer into vehicles after a crash to retrieve the last few seconds of data before the crash. With any equipment there is upkeep. We need to purchase the current vehicle bundle so they can continue to use the equipment. The only place to purchase the equipment is from the original manufacturer of the product, Crash Data Group. They have provided a quote valid for 30 days. After the quote was examined by the officers the only item they do not need is the Carry Case which they feel they can purchase something at Walmart. The cost before removing the carry case is \$1288.00. There is money available in the equipment repair and maintenance to pay for the purchase.

Respectfully,

Sheriff Lee Teschendorf
